

Exporting: React

- ✦ No official package
- ✦ Several third party packages
 - ✦ **web-react-components**, react-web-components, skatejs
- ✦ Import and call `register()` with component, props, tag-name

My pick: <https://github.com/ChristophP/web-react-components>

Exporting: Vue

- Official package: @vue/cli and @vue/cli-service-global
- No Required code change
- CLI support build output
- `vue-cli-service build --target wc --name <prefix> './path'`

<https://cli.vuejs.org/guide/build-targets.html#web-component>
