

# Some Use Cases

- ✦ Upgrade path to newer framework
- ✦ Keep investment in older code
- ✦ Embed framework components
  - ✦ CMS / other software
  - ✦ Server side rendering (JSP / Jade)
- ✦ Reusable component library

# Exporting: Angular

- ✦ Official package: @angular/elements
- ✦ Using outside Angular not officially supported yet
- ✦ Requires some roll-your-own builds
- ✦ Improvements coming
