

# Export to Web Component

- ✦ Packages available for each major JS framework
- ✦ Wrap JS framework components
- ✦ Wrapper calls browser API to register web component
- ✦ Converts inputs/props to attributes or properties
- ✦ Import minimal runtime for framework
- ✦ Different levels of maturity in wrapper

# Some Use Cases

- ✦ Upgrade path to newer framework
- ✦ Keep investment in older code
- ✦ Embed framework components
  - ✦ CMS / other software
  - ✦ Server side rendering (JSP / Jade)
- ✦ Reusable component library
