Exporting: React

* No official package

* Several third party packages

    * **web-react-components**, react-web-components, skatejs

* Import and call `register()` with component, props, tag-name

My pick: https://github.com/ChristophP/web-react-components

@dstanich

Exporting: Vue

* Official package: @vue/cli and @vue/cli-service-global

* No Required code change

* CLI support build output

* `vue-cli-service build --target wc --name <prefix> './path'`

https://cli.vuejs.org/guide/build-targets.html#web-component
